What's New In AutoCAD?

New command: @PAPER
The new command @PAPER
allows you to import and
mark up paper and paper
sheets from a PDF or image
file. You can add markups to
the paper and you can see
the paper in the drawing.

Markups will be updated automatically as you move or scale the paper. In addition, you can export the marked up paper into a PDF or TIFF file. The new markups include annotations, editable text, and geometric primitives. You can also add measurement units, such as inches, mm, or cm. @PAPER is easy to use. Once you add markups to the paper, you can use the Markup

Assistant to automatically select the markups and import them into the drawing. You can import @PAPER to CAD by using the Markup Import tool, the user interface, or the Import Utility. Add geometric primitives to the paper. (video: 1:00 min.) For more information, visit our website: [markups](#) “If you can imagine it, you can draw it.” – Albert Einstein

move and manipulate the
selected object. For
example, you can use

door. AutoSnap will be available as an AutoSnap tool that can be configured and installed separately. (video: 1:01 min.) AutoSnap is smart and powerful. AutoSnap will perform different types of operations on objects based on their feature type. It will snap to a point you have previously added to the drawing. Another new feature is that AutoSnap can be used to snap to an imaginary anchor

point that is inserted in the drawing. Drawing Tools in AutoCAD 2020: A new command has been added to the drawing window. You can use the @PAPER command to import a paper or paper sheet into the drawing. Note: To use the paper command, you must have installed the AutoCAD PaperMarkup plug-in. You
