Insurgency: Sandstorm is a third-person shooter set in the Middle East during a time of turmoil. You can choose to complete 'Ops' with the Security Forces, or 'Jihad' for the Insurgent team. The player will control a number of characters, each with their own strengths and weaknesses. Characters will use the 'Jihad' path to complete their objectives, while Security Forces will complete their objectives with a more stealthy approach. Work closely with your teammates to complete the game in the fastest time. The Bear Claw is a semi-automatic weapon by C.S.G. (Concealed Sub Machine Gun), the Serbian version of the Kalashnikov series, made famous by the AK-47. Semi-automatic weapons were introduced to the Kalashnikov family during the 20th century and marked the end of the bolt action, and the beginning of the modern era. The Bear Claw utilizes a double stack semi-automatic firing system, where the first shot is fired using a full 30 round clip, and the second shot is fired with a significantly decreased amount of ammunition. With the first shot, the weapon is unloaded. After that first shot, the trigger is depressed and manually pulled back to cock the weapon. After an additional half second, a bolt is slammed forward and the weapon is ready to fire. The trigger is automatically returned to the fire position and the round is fired. The trigger can be manually pulled back to reload. The default configuration for the Bear Claw in-game is with a 30 round double stack clip, with the round of ammunition before the first shot being completely empty. It can be upgraded to a 60 round double stack clip, with the round of ammunition before the first shot being fully loaded. The round of ammunition after the first shot is currently modified, resulting in a 40 round single-stack clip. Upgrade trees for the Bear Claw are available to all Security and Insurgent users, with the standard weapons of the class available from the start of the game. The Assault classes obtain the most frequently used weapons, while the Sniper classes obtain the least used weapons. Each class has the following weapons available to them: Bear Claw Weapon Skin Set Pack Show them your resolve by fighting tooth and nail with the Bear Claw Weapon Skin Set. These skins can be equipped in the Loadout menu on both Security and Insurgent teams for the following weapons where available: Desert Eagle AKM (Rifleman) SKS (Advisor) Sterling (Breacher) TO

The After is a setting of savage frontier action (think The Revenant or Jeremiah Johnson) in a sci-fi post-apocalyptic world (think Annihilation or The Quiet Place). It uses the newly retooled Savage Worlds Adventure Edition. The After is set in the northwestern reaches of the broken North American continent. You play survivors of the shattered human race trying to rebuild their world after nearly a century of alien predation and war. The destructive invasion of Earth, followed by a terrifying war between rival Alien species far more advanced than mankind, has left the Earth a broken version of its former self. Major cities and areas of industrial and military strength have been completely obliterated. Only in the worlds most sparsely populated areas have people survived: areas that were ignored by the rampaging alien forces. It is now a world of great change but also great opportunity; a strange world to explore and to forge a new home in. With the collapse of modern civilization, survivors must return to the old ways, find inspiration and knowledge utilized by frontiersman and native people who lived and prospered in North America centuries before. New bonds must be formed, new settlements require aid and protection and the war ravaged ruins of Pre-Harvest Earth need to be explored for their knowledge and resources.

The war is over. The Enemy has gone. Reclaim the Earth.
